NEOLINE COMPOSITE SIDING

NeoLine wood composite siding combines strength, lasting protection and contemporary style with minimal upkeep.

- **Strong core, recycled materials:** Made with 65% recycled wood fibres, 30% recycled high-density plastic and 5% adhesive, NeoLine's durable core helps reduce waste and demand for virgin resources.
- **Protective Surlyn™ cap:** Co-extrusion bonds a protective resin layer to each board, enhancing resistance to UV exposure, water, stains and scratches.
- **Minimal maintenance:** Enjoy lasting beauty without regular painting or staining.
- **More design choices:** Choose from eight distinctive colours and two profiles—panel or fluted—each with a refined brushed texture to complement your exterior.

INNOVATION BEYOND WOOD

NeoLine Composite Siding combines the warmth and character of wood with superior durability and significantly less maintenance. It requires no painting, staining, or sanding and is designed to resist fading, moisture, rot, and deterioration, maintaining its long-lasting beauty with minimal upkeep.

In addition to natural wood-inspired finishes, NeoLine Composite Siding is available in bold, contemporary colours such as Graphite and Onyx Black. These sophisticated shades offer greater design flexibility, making them ideal for striking modern façades and distinctive architectural accents.

(DARK WALNUT)

TIMELESS STYLE. LASTING PERFORMANCE.

Wood composite siding is an emerging choice in exterior design, offering a sleek, contemporary alternative to traditional wood, vinyl, fibre cement and stucco. Its refined profiles, rich colours and elegant finishes create a premium look that complements both traditional houses and modern homes. Ideal for new construction and renovations, it can bring character to a new build or refresh an older home's exterior. With minimal upkeep and lasting beauty, wood composite siding offers enduring appeal for years to come.

TONGUE-AND-GROOVE DESIGN

NeoLine Composite Siding features an innovative tongue-and-groove interlocking design that allows each panel to connect securely and align consistently. The system eliminates the need for separate clips or complicated fastening components. Panels are installed directly onto metal furring or wood strips using self-tapping screws, helping reduce installation time while creating a clean, streamlined finish.

PRE-DRILLED HOLES

NeoLine composite siding features factory pre-drilled fastening slots every $\frac{3}{4}$ inch, reducing on-site measuring and drilling for faster, easier installation and lower labour costs. When correctly fastened, the elongated slots accommodate natural expansion and contraction as temperatures change, reducing stress around screw locations and helping protect against warping, buckling and cracking for lasting performance.

NEOLINE FLUTED SIDING

- Distinctive fluted profile creates depth, texture and shadow lines
- Delivers a contemporary, architectural appearance
- Ideal for feature walls, entrances, soffits and accent area
- Especially suited to modern residential and commercial designs
- Available in 8 colours
- Effective coverage per board: **6.2 square feet**

8.7" X 1" X 9.5'

NEOLINE PANEL SIDING

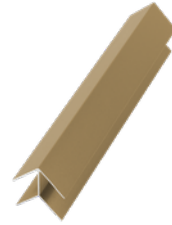

- Smooth, streamlined profile creates a clean and uniform appearance
- Complements both contemporary and traditional architecture
- Ideal for full façades and larger exterior wall areas
- Pairs well with fluted siding to create contrast and visual balance
- Available in 8 colours
- Effective coverage per board: **4.1 square feet**

6" X 0.8" X 9.5'

TRIMS & ACCESSORIES

NeoLine offers both aluminum and composite trims for a refined, professionally finished installation. Our slim-profile aluminum trims are colour-matched to the boards and blend discreetly into the panels. Composite trims match the material, texture, and colour of the panels, creating a seamless, cohesive appearance. A complete selection of trims is available to finish corners and exposed edges perfectly. Metal furring is also recommended to provide a strong, durable, and properly ventilated support system.

ARCHITECTURAL FLUTED SIDING

NeoLine composite fluted siding has quickly become a favourite among architects and designers for its clean lines, dimensional texture, and contemporary aesthetic. Its sculpted profile brings depth, rhythm, and definition to exterior façades, creating dynamic patterns of light and shadow throughout the day. Ideal for full exterior applications or distinctive architectural accents, it pairs beautifully with stone, brick, concrete, and stucco. Combining architectural appeal with the durability and low-maintenance performance of composite materials, NeoLine fluted siding delivers a refined finish designed to last.

COMPOSITE PANEL SIDING

NeoLine composite panel siding offers a modern twist on traditional siding, combining the timeless appeal of shiplap with the durability and low-maintenance benefits of composite materials. NeoLine boasts eight stunning colours and offers both vertical and horizontal installation styles, providing versatility to suit any architectural design. Its innovative design provides a sleek and uniform finish, perfect for enhancing the aesthetic appeal of any building facade while ensuring long-lasting performance against the elements. With NeoLine, homeowners can enjoy enduring beauty while minimizing maintenance efforts.
